Lite Beton

Die Lite Beton Gefäße sind edel und zeitlos. Trotz ihres betonähnlichen, schweren Aussehens sind sie aus Leichtwerkstoffen (Fiberglas und Polyester) hergestellt. Auch diese Gefäße sind UV-stabil und bei gewährleistetem Wasserablauf frostbeständig. Lite Beton ist sehr vielfältig einsetzbar und für drinnen und draussen geeignet.

Lite Beton

Les récipients Lite Beton sont nobles et intemporel. Bien que leur apparence ressemble à celle du béton ils sont faits de matériaux légers (fibre de verre et polyester). Ces récipients sont également résistants aux UV et au gel si l'écoulement d'eau est garanti. Lite Beton est très polyvalent et convient à un usage intérieur et extérieur.
